Menadi

ceramic vases

STUDIOZERO

Menadi

In the Hellenic tradition, the Maenads were female followers of Dionysus who, through wild dances and initiation rites, were able to merge and become one with God himself. This process was ‘invasive’ in both the literal and figurative senses of the word; they allowed themselves to be filled with the divine in order to become divine themselves in a mystical and transcendent unification.

It is from this powerful vision, both ancient and modern, that our Menadi terracotta vases are born, bodies suspended in the convulsive momentum of a step in an impetuous dance, traversed by the vital energy that makes the world vibrate, shaken by that divine spark which continuously aspires to elevation.

Nella tradizione ellenica, le Menadi erano le seguaci di Dioniso che attraverso danze selvagge e riti iniziatrici erano in grado di fondersi e divenire una cosa sola col Dio stesso. Erano “invasate” nel senso più letterale e insieme figurato del termine, si lasciavano riempire dal divino per diventare esse stesse divino in un’identificazione mistica e trascendente.

Da questa visione potente nascono i nostri vasi Menadi, corpi sospesi nello slancio convulso di un passo di danza impetuosa, attraversati dall’energia vitale che fa vibrare il mondo, scossi da quella scintilla divina che aspira continuamente alla sublimazione.
